EAA Chapter 6

March 2022
Volume 24 Issue 02

President's Corner

Well, February lived up to its reputation as the shortest month. We're already into March and Spring is just around the corner. This year marks the 40th anniversary of the adoption of FAR Part 103, codifying the concept of ultralight aircraft in federal regulation. There's just something special about an aircraft that weighs less than 254 pounds dry. EAA will be celebrating this event at Airventure '22, but to get the party started they produced a 3 day series of webinars last month under the banner of "Virtual Ultralight Days". There were 15 sessions over the three days and I attended all but 3 of them. I will be presenting a recap of the sessions that I attended at this month's meeting, but all the sessions were archived at eaa.org if you're interested.

Come join us on Saturday to talk about the lightest of sport aircraft.
